
Date: Tuesday, Feb. 20th

Time: 12:15- 1:15 p.m. (pizza & salad at 12:15 p.m.)

Location: 310 Rhodes Hall

For: Students, faculty & staff (no registration required)

Speaker: Ben Trumbore, Computational Scientist, Cornell Center for Advanced Computing (CAC)

ParaView is an open-source data analysis and visualization application that can be used to present data in 3D. It can handle extremely large data sets and runs on hardware from laptops to supercomputers. In this talk, we will demonstrate the main features of ParaView and how it can be used to analyze and present data from a wide range of scientific applications.
